“NO FACIAL RECOGNITION”

The practice by most *vigilantes* patrolling the US-Mexico border of denying facial recognition is the clearest indicator that criminal activity is taking place. This concept of operations was alluded to via the partial obscuring of the face of the *vigilante* in Trump’s TV spot. Avoiding facial recognition is an old American tradition among criminal and domestic terrorist organizations like the Ku Klux Klan. The fact that *vigilantes*, ranchers and Minutemen couch their actions in patriotic and/or religious overtones does not negate the fact that they are engaged in *domestic terrorism* against Hispanics / Latinos / Mesoamericans and various forms of race-based *genocide*.
