“THE NEW MEXICO EASTER MIRACLE”

The real miracle on April 18, 2019 when more than 300 migrant men, women and children surrendered to *militias* of the United Constitutional Patriots operating on the border with New Mexico **is the fact that they are still alive.** Since the 18th century, thousands of migrants have not surrendered but *succumbed* to acts of domestic terrorism committed by border *vigilantes*. Apparently the *militias* didn't want a mass execution of this size on their conscience on Good Friday. These border region “patriots” are the same type of *fake soldiers* that Trump honored by casting a *vigilante* for his campaign ad. **Details such as camouflaged uniform, scoped assault rifle, boonie hat, intimidating presence on the border, CONOPS (Concept of Operations) and readiness to use lethal force against *Mexicans* coming across the southern border are identical.**
