“THE CHYRON WAS BROKEN”

Technical evidence on the deliberate omission of a standard and appropriate disclaimer

The *Chyron* (character generator or graphics text generator) as it's commonly referred to in video post-production suites was extensively used throughout Trump's TV spot, with perfect timing and precise positioning. It was used to credit the news sources of Sen. Clinton's immigration policies mentioned by the narrator during the first half. The *same Chyron* was used for the text overlays for the second half, including the final disclaimer "*PAID FOR BY DONALD J. TRUMP FOR PRESIDENT, INC. APPROVED BY DONALD TRUMP.*" When integrity is present in video production, words such as *Dramatization* or *Not a real US Soldier* or *Courtesy of the Minutemen* would have been added to alert viewers to the fact that the on-screen subject was not a member of the US Armed Forces. This omission is clearly intentional thus the audience is misled into believing, trusting or assuming that the subject is a legitimate US soldier. The video edit decision to portray *Trump's vigilante* in this misleading manner is 100% *deliberate and premeditated.*
